DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. Claim 4 recites the limitation "the non-size" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

3. Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6365808 in view of Murrell.

The applicant claims the use of a revised string arrangement for a musical instrument utilizing six string with different diameters placed in specific positions. U.S. Patent No. 6365808 also discloses the use of a revised string arrangement for a musical instrument utilizing six strings with different diameters placed in specific positions.

U.S. Patent No. 6365808 does not disclose the use of strings with different diameters placed in specific positions as recited by the applicant.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device to include the specific string arrangement as disclosed by the applicant in order to achieve a specific tuning arrangement.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greory.

Greory discloses the use of a musical instrument having a body (1), a neck (2), a bridge(6), a nut (8), and a revised string arrangement for a musical instrument with six strings with six different diameters placed in specific positions (see column 3, lines 60-65).

Greory does disclose the specific string positions as recited by the applicant.

However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the string placement as disclosed Greory to include the specific string placement as recited by the applicant in order to specifically tune a musical instrument according to a user's desire.

Art Unit: 2837

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gregory discloses the use of a guitar with specific tunings.
